HOBBIES

Music production, Sound design and create film scores.

PROFESSIONAL EXPERIENCE

Data scientist

Center for the Development of Advanced Technologies (Feb - Jun 2022)

- Worked along side researchers and a proffesor to develop a solution for managing parking lots in the most effectif way.
- Created a robust model detection using deep learning techniques (tesnorFlow, Keras).

ACADEMIC BACKGROUND

Master's degree in Visual Computing

Houari Boumediene University of Science and Technology

Sep 2020 - july 2022

- Mastering the visualization of large masses of static data.
- Problem solving, knowledge representation and machine learning.

Bachelor's degree in Computer Science

Houari Boumediene University of Science and Technology

Sep 2017 - july 2020

- Solid basic training in computer science, in its scientific, technological and practical aspects
- Problem solving,

PROJETS

Crypto-app

Responsive Web Application

- Displays crypto currencies with their respected data utilizing an API with user authetification.
[React](#), [Light/Dark Theme](#), [Tailwind](#), [Authentication](#), [Firebase](#), [API](#)

StockNet

Full-stack Web Application

- Web application with a backend that manages a merchand stock, with user Authentification.
[Python](#), [user authentication](#), [Django](#), [React](#)

HooBank

Frontend Web Application

- A modern website displaying features that Hoobank provides with statistics.
[React](#), [Tailwind](#), [Vite](#)
